

DGP BIOCARRIER

The **DGP BIOCARRIER** is suitable for multiple site and 'milkround' collections. Simple to open and close, the foam lid and base pads ensure optimal protection and cushioning of samples during transit. Durable, protective and easy to carry, the **DGP BIOCARRIER** has a built in handle and can be stacked and locked together making it efficient for transport and storage. It is a reusable cost effective solution.

The **BIOCARRIER** should be used with 95kPa primary or secondary containers such as a **DGP PATHOPAK**, **PATHOSHIELD** or **PATHOPOUCH**.

Components Supplied:

- Outer printed in compliance with IATA & ADR transport regulations
- Durable ABS plastic case keeps samples safe.
- Built in carry handle

Product	Product Code	Qty.	Int. Dims. L X W X H (mm)	Ext. Dims. L X W X H (mm)	Vol. Wt. (Kg)	Total. Wt. (Kg)
