

# DGP PATHOPOUCH 95kPa

**DGP PATHOPOUCH** 95kPa flexible pressure vessels are designed to comply with the latest IATA test guidelines (independently tested by BVI – an ISO 17025 accredited laboratory).

A **PATHOPOUCH** is suitable to protect a wide range of primaries including blood tubes, specimen containers, swabs, blood collection/transfusion bags and medical devices.

This single pouch solution encompasses a simple closure system ensuring ease of packing as well as an easy tear opening for sample reception. Each **PATHOPOUCH** has an external document pouch enabling information to be retained with specimens. **The DGP PATHOPOUCH Xcel** was launched as the largest IATA test compliant 95kPa pouch available on the market.

In addition, DGP design branded and bespoke sized **PATHOPOUCH**'s according to client specification.

Product	Product Code	Case Qty	Opening Dims. (mm)	Internal Dims. (mm)
<b>PATHOPOUCH 95kPa Xcel</b>	BP007	50	325	462 x 335
<b>PATHOPOUCH 95kPa Xcel c/w 6 Bay Absorbent</b>	BP008	50	325	462 x 335
