

DGP PATHOSEAL LIQUITITE

The **DGP LIQUITITE** range are leak proof flexible pouches suitable to protect a wide range of primaries including blood tubes, specimen containers, swabs, blood collection/transfusion bags and medical devices.

The simple closure system enables ease of packing and a unique tamper evident seal ensures integrity of specimens.

The **LIQUITITE** pouches have a unique and sequential number ensuring chain of custody and an external document pouch (with exception to the A6).

The **DGP 'VIPER'** ensures a fast, non-strenuous opening to a pouch while reducing product damage. Ideal for high volume sample reception addressing.

| Product | Product Code | Case Qty | Opening Dims. (mm) | Internal Dims. L x W (mm) |
